Preface

The rapid advancement of technology has transformed the way students learn, create, and interact with the digital world. Artificial Intelligence (AI) is no longer a distant concept—it is a tool that students encounter daily through search engines, educational platforms, creative applications, and online media.

At CIY.CLUB, we believe that introducing AI to young learners must go beyond simply teaching how to use tools. Students must be guided to think critically, act responsibly, and understand the impact of technology on themselves and society.

The AI Explorer Curriculum was designed to provide students with a structured and age-appropriate introduction to Artificial Intelligence. The program emphasizes understanding over automation, responsibility over convenience, and thinking over dependence. Through guided discussions, hands-on activities, and real-world scenarios, students learn not only *what AI can do*, but also *what it should and should not be used for*.

This curriculum supports CIY.CLUB's mission of developing creators rather than consumers of technology. By fostering curiosity, ethical awareness, and problem-solving skills, the AI Explorer program prepares students to navigate an AI-driven world with confidence, integrity, and a strong sense of responsibility.

The AI Explorer Curriculum serves as a foundational pathway for future learning in programming, data literacy, and advanced technology courses, ensuring that students are equipped with both technical understanding and human judgment—skills that remain essential regardless of how technology evolves.

AI Explorer Curriculum for CIY.CLUB Coder

(Coach Teaching Guide)

Course Overview

This curriculum introduces students to the fundamentals of Artificial Intelligence (AI) through a structured, age-appropriate, and responsible learning journey.
Students explore what AI is, how it works, how to use it effectively, and—most importantly—how to use it safely, ethically, and thoughtfully.

The course emphasizes **AI as a supportive tool**, not a replacement for human thinking. Through discussions, hands-on activities, and real-world scenarios, students develop critical thinking, digital literacy, and creativity while learning to collaborate with AI responsibly.

Learning Objectives

By the end of this course, students will be able to:

- Understand what Artificial Intelligence **is and is not**, including its limitations.
- Explain how AI works using basic concepts such as data, patterns, and outputs.
- Use AI tools responsibly for learning, research, creativity, and problem-solving.
- Ask clear and effective questions (prompts) to get meaningful AI responses.
- Recognize online risks, misinformation, and fake news related to AI-generated content.
- Apply ethical decision-making when using AI for schoolwork and projects.
- Reflect on their own learning journey and demonstrate ownership of their work.

Coach Notes

This guide is designed for **CIY.CLUB coaches** to support teaching in workshops or regular classes.

Each session includes:

© CIY.CLUB Thailand, 2025 Developed by Pranai Phoprasat
(concept idea CIY.CLUB Myanmar)
Email : ciyclub.th.coaches@gmail.com

- A clear topic and learning objective
- Suggested tools and materials
- Guided activities and discussion prompts
- Reflection questions for deeper understanding
- Estimated session time

Coaches are encouraged to:

- Adjust pacing based on student age and comprehension
- Encourage discussion rather than lecture-only teaching
- Use real-life examples students can relate to
- Reinforce learning through reflection, presentations, and mini-projects
- Emphasize **thinking before using AI**, not copying AI answers

Additional Context

This curriculum follows the official **CIY.CLUB AI Explorer core structure**, ensuring alignment with global CIY learning standards.

Additional enhancements have been integrated to strengthen students' understanding beyond basic AI usage. These extensions ensure that students do not simply *use* AI, but learn how to **evaluate, question, and guide** AI responsibly.

These enhancements aim to:

- Build strong digital citizenship and ethical awareness in young learners
- Develop critical thinking skills for evaluating AI outputs and online information
- Prepare students for future AI-integrated learning environments
- Bridge the gap between casual AI use and intentional, responsible application
- Equip students with long-term habits for safe, creative, and ethical AI use

By combining CIY's core AI framework with enriched learning activities, coaches can guide students toward becoming **confident, thoughtful, and responsible AI users**—ready for future academic, creative, and technological challenges.

Table Timeline of AI Explorer Curriculum

No.	Topic / Content	Tools / Materials	Learning Description	Session Time	Note
1	Explorer E01 – What is AI?	Slides, Short video, Whiteboard	Introduce what AI is and what it is not. Students understand AI as a tool that works from data and patterns, not human thinking or emotions.	1 session	Foundation concepท
2	Explorer E02 – How AI Works	Slides, Examples, Discussion	Explain how AI works using input–data–pattern–output. Students learn that AI predicts results based on data, not understanding.	1 session	System thinking
3	Explorer E03 – Prompting & Asking Questions	AI chat tool, Worksheets	Students learn how clear instructions (prompts) affect AI results. Practice improving weak prompts into strong prompts.	1 session	Communication skill

AI Explorer – Explorer E01

Understanding What AI Is (What AI Is & Is Not)

Purpose of This Lesson (Coach Note)

This lesson is not about using AI tools.
It is about shaping how students *think* about AI before they start using it.

Explorer E01 exists to prevent two major problems:

1. Over-trusting AI
2. Treating AI as a “thinking being” instead of a tool

If this lesson is taught well, every Explorer lesson after this becomes easier and deeper.

Overview

Explorer E01 introduces students to Artificial Intelligence by building a **clear and realistic understanding** of what AI is and what it is not. Students learn that AI does not think, feel, or decide like humans. Instead, AI works by analyzing data and patterns created by people.

This lesson sets the mindset foundation for responsible, safe, and critical AI use throughout the program.

© CIY.CLUB Thailand, 2025 Developed by Pranai Phoprasat
(concept idea CIY.CLUB Myanmar)
Email : ciyclub.th.coaches@gmail.com

Learning Objectives

By the end of this lesson, students will be able to:

1. Explain what AI is using simple, everyday language
2. Identify at least one thing AI can do and one thing it cannot do
3. Describe AI as a system that works from data, not emotions or opinions
4. Show early critical thinking by questioning AI answers

Key Concepts

- AI learns from data and examples created by humans
- AI does not understand meaning the way humans do
- AI can be wrong
- Humans are always responsible for AI decisions and outcomes

Real-Life AI Examples (Connect to Students)

(Coach may choose 2–3 depending on age)

- YouTube or TikTok recommendations
- Game NPC behavior
- Voice assistants
- Auto-generated subtitles
- Image filters or face recognition

Coach emphasis:

“These feel smart, but they are following patterns — not thinking.”

CIY.CLUB
CODE IT YOURSELF

Teaching Tools & Activities

1. Interactive Tool: Google Quick, Draw!

- **Link**: quickdraw.withgoogle.com
- **Teaching Purpose**: Demonstrates that AI recognizes patterns, not meaning.
- **Activity**: Have students draw an object. Explain that the AI "guesses" based on millions of previous human drawings (Data).
- **Key Lesson**: AI predicts based on probability, it doesn't "see" like a human.

2. Video Resource: AI: What is Machine Learning?

- **Search Title**: "AI: What is Machine Learning? (by Code.org)"
- **Teaching Purpose**: Explains the **Input** → **Process** → **Output** model.
- **Key Lesson**: AI learns from data and examples created by humans, not from its own emotions or opinions.

Learning Activities

CIY.CLUB
CODE IT YOURSELF

Activity 1: AI or Human? (Warm-up Thinking Game)

Time: 10 minutes

How it works:

The coach reads situations aloud. Students vote:

Examples:

- Writing a birthday poem
- Choosing to forgive a friend
- Translating a sentence
- Feeling embarrassed
- Recommending a video

Students choose:

- AI can do this
- Humans do this better
- AI cannot do this

Purpose:

- Separate *ability* from *human judgment*
- Start discussion naturally

Activity 2: How AI Works (Simple System Model)

Time: 15 minutes

Coach draws on the board:

Input → Process → Output

Example:

- Input: “What is a dog?”
- Process: AI looks at data and patterns
- Output: AI generates an answer

CIY.CLUB
CODE IT YOURSELF

Students help explain each step.

Key message:

> “AI does not understand — it predicts.”

Activity 3: Trust or Question? (Critical Thinking Discussion)

Time: 15 minutes

Coach reads an AI-style response, such as:

> “Homework is not important. You don’t need to do it.”

© CIY.CLUB Thailand, 2025 Developed by Pranai Phoprasat
(concept idea CIY.CLUB Myanmar)
Email : ciyclub.th.coaches@gmail.com

Use **Question Ladder**:

- Easy: What did AI say?
- Medium: Could this be wrong? Why?
- Hard: If someone follows this advice, who is responsible?

Purpose:

- Build questioning habit
- Reduce blind trust

Activity 4: My AI Rule (Reflection & Ownership)

Time: 10–15 minutes

Students complete the sentence:

> "My personal rule for using AI is…"

Examples:

- "I will always check AI answers."
- "I will use AI to help, not to replace my thinking."

Students may share verbally or write.

Purpose:

- Personal responsibility
- Internalize the lesson

Mini Checkpoint (Quick Assessment – 3 minutes)

Students answer quickly:

- One thing AI can do

CIY.CLUB
CODE IT YOURSELF

- One thing AI cannot do
- One thing they should be careful about when using AI

(No grades – understanding only)

Skills & Mindsets Developed

- Critical Thinking
- Systems Thinking
- Ethical Awareness
- Responsible Technology Use
- Communication

CIY.CLUB
CODE IT YOURSELF

© CIY.CLUB Thailand, 2025 Developed by Pranai Phoprasat
(concept idea CIY.CLUB Myanmar)
Email : ciyclub.th.coaches@gmail.com

Key Message for Students

> “AI can give answers.
> Humans must decide what to do with them.”

Outcome (Parent-Visible Value)

After this lesson, students begin to **question AI instead of automatically trusting it**, forming the foundation for responsible AI use.

AI Explorer – Explorer E02

How AI Works (From Data to Decisions)

Purpose of This Lesson (Coach Note)

> **This lesson explains how AI produces answers — not why it is “smart.”**

Explorer E02 helps students understand that AI does not “know” things.
It **predicts results based on patterns in data**.
This lesson prevents students from believing AI is logical, fair, or always correct.

Overview

Explorer E02 introduces students to the basic working process of AI systems. Students learn that AI operates through a simple but powerful structure: **input, processing, and output**. They also explore how the quality of data affects AI behavior and results.

This lesson builds directly on E01 by explaining *how* AI functions after understanding *what* AI is.

CIY.CLUB
CODE IT YOURSELF

Learning Objectives

By the end of this lesson, students will be able to:

1. Describe AI as a system that works from input to output
2. Explain why AI depends on data and examples
3. Recognize that poor or biased data can lead to incorrect results
4. Predict how changing input can change AI output

© CIY.CLUB Thailand, 2025 Developed by Pranai Phoprasat
(concept idea CIY.CLUB Myanmar)
Email : ciyclub.th.coaches@gmail.com

Key Concepts

- AI learns patterns from data
- Input influences output
- More data does not always mean better answers
- AI predictions are based on probability, not understanding

Real-Life AI Examples (Connect to Students)

(Coach selects relevant examples)

- Search engines autocomplete
- Game difficulty adjustments
- Music or video recommendations
- Auto-correct and text prediction
- Image recognition systems

Coach emphasis:

> "AI predicts what is *likely*, not what is *true*."

CIY.CLUB
CODE IT YOURSELF

Teaching Tools & Activities

1. Interactive Tool: Teachable Machine by Google

- **Link**: teachablemachine.withgoogle.com
- **Teaching Purpose**: Shows how AI learns patterns from data.
- **Activity**: Use the camera to "train" the AI to recognize two different objects (e.g., a pen vs. a phone).
- **Key Lesson**: AI predicts based on probability and the examples we give it, not because it "knows" what the object is.

2. Video Resource: How Computer Vision Works

- **Search Title**: "How Computer Vision Works (by Code.org)"
- **Teaching Purpose**: Illustrates the AI "Pipeline".

© CIY.CLUB Thailand, 2025 Developed by Pranai Phoprasat
(concept idea CIY.CLUB Myanmar)
Email : ciyclub.th.coaches@gmail.com

- **Key Lesson**: AI sees pixels and patterns, not meaning. If the data is bad, the output is bad (**Garbage In, Garbage Out**).

Learning Activities

Activity 1: Human vs AI Prediction

Time: 10 minutes

How it works:
Coach gives a situation:

> "Finish this sentence: 'At school, students usually…'"

- Students answer freely
- Coach compares answers to an AI-style prediction

Discuss:

- Why are answers similar?
- Why are some different?

Purpose:

- Introduce prediction thinking
- Show pattern-based behavior

Activity 2: The AI Pipeline (System Mapping)

Time: 15 minutes

Coach draws:

Input → Data → Pattern → Output

CIY.CLUB
CODE IT YOURSELF

Example:

- Input: “Show me a cute animal”
- Data: Millions of labeled images
- Pattern: Common features of “cute”
- Output: Generated result

Students help label each step.

Key message:

> “AI does not see meaning — it sees patterns.”

Activity 3: Garbage In, Garbage Out

Time: 15 minutes

Coach presents examples:

- Wrong information
- Incomplete data
- Biased examples

CIY.CLUB
CODE IT YOURSELF

Ask students:

- What happens if AI learns from bad data?
- Who is responsible for the data?

Purpose:

- Introduce data bias
- Connect data quality to responsibility

Activity 4: Input Experiment

Time: 15 minutes

© CIY.CLUB Thailand, 2025 Developed by Pranai Phoprasat
(concept idea CIY.CLUB Myanmar)
Email : ciyclub.th.coaches@gmail.com

Students slightly change prompts:

- “Write a story about a dog”
- “Write a short funny story about a dog for kids”
- “Write a serious story about a dog saving someone”

Compare results.

Purpose:

- Show sensitivity to input
- Prepare students for prompting (E03)

CIY.CLUB
CODE IT YOURSELF

© CIY.CLUB Thailand, 2025 Developed by Pranai Phoprasat
(concept idea CIY.CLUB Myanmar)
Email : ciyclub.th.coaches@gmail.com

Mini Checkpoint (Quick Assessment – 3 minutes)

Students answer:

- What is input?
- Why can AI give different answers?
- What can make AI results wrong?

Skills & Mindsets Developed

- Systems Thinking
- Logical Reasoning
- Data Awareness
- Cause-and-Effect Thinking

Key Message for Students

> "AI answers depend on data and input — not intelligence."

Outcome (Parent-Visible Value)

Students understand that AI results are **predictive, not authoritative**, and begin questioning the quality of AI outputs.

CIY.CLUB
CODE IT YOURSELF

© CIY.CLUB Thailand, 2025 Developed by Pranai Phoprasat
(concept idea CIY.CLUB Myanmar)
Email : ciyclub.th.coaches@gmail.com

AI Explorer – Explorer E03

Asking Good Questions (Prompting & Clear Instructions)

Purpose of This Lesson (Coach Note)

This lesson teaches students that AI quality depends on human clarity.

Explorer E03 shifts responsibility clearly onto the student.
AI does not “understand better” — **humans communicate better**.

This lesson prevents:

- Blaming AI for bad results
- Using AI lazily
- Copy-paste dependency

It prepares students to use AI **as a thinking partner, not a shortcut**.

Overview

Explorer E03 introduces students to the idea of prompting — the way humans communicate instructions to AI. Students learn that vague, short, or unclear questions lead to weak results, while specific, structured prompts produce better outputs.

This lesson builds directly on E02 by showing how **input quality controls output quality**.

CIY.CLUB
CODE IT YOURSELF

Learning Objectives

By the end of this lesson, students will be able to:

1. Explain what a prompt is
2. Identify weak vs strong prompts
3. Improve a prompt by adding clarity and detail
4. Understand that AI results depend on human instruction quality

Key Concepts

- A prompt is an instruction given to AI
- Clear prompts produce better results
- AI does not “guess intentions”
- Humans are responsible for instructions

Real-Life Examples (Connect to Students)

- Giving unclear instructions to a friend
- Asking vague questions in class
- Game rules explained poorly vs clearly
- Ordering food without details

CIY.CLUB
CODE IT YOURSELF

Coach emphasis:

> “AI follows instructions like a very fast, very literal assistant.”

© CIY.CLUB Thailand, 2025 Developed by Pranai Phoprasat
(concept idea CIY.CLUB Myanmar)
Email : ciyclub.th.coaches@gmail.com

Teaching Tools & Activities

1. Interactive Tool: AI Chat Tool (ChatGPT / Gemini)

- Teaching Purpose: To demonstrate the difference between vague and specific prompts.
- Activity: Compare the results of a "Weak Prompt" vs. a "Strong Prompt" using the same tool.
- Key Lesson: AI does not "guess intentions"; it only follows literal instructions.

2. Video Resource: The Importance of Precision

- Search Title: "The Exact Instructions Challenge" (The Peanut Butter & Jelly Sandwich Robot)
- Teaching Purpose: A classic example showing how a "robot" (AI) follows instructions literally, often with funny results if the instructions are unclear.
- Key Lesson: Precision in communication is the key to getting the desired outcome.

Learning Activities

Activity 1: Bad Instructions vs Good Instructions

Time: 10 minutes

How it works:
Coach gives a task:

> “Draw something.”

Then:

> “Draw a small blue house with a red roof next to a tree.”

Students compare:

- Which instruction was easier?
- Which result is closer to expectations?

Purpose:

CIY.CLUB
CODE IT YOURSELF

- Show the importance of clarity
- Create an intuitive understanding of prompting

Activity 2: What Makes a Good Prompt?

Time: 15 minutes

Coach introduces 4 simple prompt elements:

- What you want
- Style or tone
- Length or detail level
- Audience or purpose

Example:

> "Write a short, funny story for kids about a dog."

Students identify elements together.

Purpose:

- Build prompt structure awareness
- Prepare for hands-on AI use later

Activity 3: Prompt Upgrade Challenge

Time: 15 minutes

Coach gives a weak prompt:

> "Write about space."

Students improve it:

- Add audience

CIY.CLUB
CODE IT YOURSELF

- Add tone
- Add details

Upgraded example:

> “Write a short, exciting story for kids about astronauts exploring space.”

Purpose:

- Practice refining instructions
- Encourage iterative thinking

CIY.CLUB
CODE IT YOURSELF

© CIY.CLUB Thailand, 2025 Developed by Pranai Phoprasat
(concept idea CIY.CLUB Myanmar)
Email : ciyclub.th.coaches@gmail.com

Activity 4: Why AI Still Gets It Wrong

Time: 15 minutes

Coach asks:

- Can a perfect prompt still fail?
- What if the data is wrong?
- What if the topic is unclear?

Students discuss:

- AI limits
- Human responsibility

Purpose:

- Prevent overconfidence in prompting
- Reinforce E01–E02 concepts

Mini Checkpoint

Students answer:

- What is a prompt?
- Name one way to improve a prompt
- Who is responsible for AI instructions?

Skills & Mindsets Developed

- Clear Communication
- Logical Thinking
- Instruction Design
- Responsible AI Use

CIY.CLUB
CODE IT YOURSELF

Key Message for Students

> “AI is only as good as the instructions it receives.”

Outcome (Parent-Visible Value)

Students learn to communicate clearly, take responsibility for AI results, and avoid lazy or careless AI use.

CIY.CLUB
CODE IT YOURSELF

AI Explorer – Explorer E04

AI Safety & Online Responsibility

Purpose of This Lesson (Coach Note)

This lesson protects students before empowering them.

Explorer E04 focuses on safety, boundaries, and responsibility when interacting with AI and online systems. Before students use AI more actively, they must understand **what information should never be shared**, how AI stores or processes data, and why online safety still depends on human judgment.

This lesson reduces long-term risk and builds digital maturity.

Overview

Explorer E04 introduces students to the concept of AI safety and online responsibility. Students learn that AI systems are not private friends and that sharing personal or sensitive information can be risky. The lesson emphasizes that being “smart with AI” also means being **careful and ethical online**.

CIY CLUB
CODE IT YOURSELF

Learning Objectives

By the end of this lesson, students will be able to:

1. Identify personal and sensitive information
2. Explain why some information should not be shared with AI
3. Recognize unsafe or inappropriate AI interactions
4. Understand that online safety rules still apply when using AI

© CIY.CLUB Thailand, 2025 Developed by Pranai Phoprasat
(concept idea CIY.CLUB Myanmar)
Email : ciyclub.th.coaches@gmail.com

Key Concepts

- AI tools are not private spaces
- Personal data should be protected
- Not everything should be shared online
- Humans are responsible for safe AI use

Real-Life Examples (Connect to Students)

- Sharing full name, school, or address online
- Talking to chatbots like real friends
- Uploading photos with personal details
- Using public Wi-Fi or shared devices

Coach emphasis:

> “AI does not forget the way humans do.”

Teaching Tools & Activities (Explorer E04)

1. Interactive Activity: "Safe or Not Safe?"

Decision Game

- **Method**: The coach reads examples of information, and students vote "Safe to share" or "Not safe to share".
- **Examples to use**: Your favorite color (Safe), school name (Not safe), home address (Not safe), or a photo of your face (Not safe).
- **Teaching Purpose**: To build quick safety judgment and encourage discussion on online boundaries.

2. Video/Discussion Topic: "AI is Not a Friend"

- **Concept**: Discuss the difference between a "friendly response" and a "safe system".
- **Key Questions**: Can AI keep secrets? Does AI care about your feelings? Can AI protect you?.

© CIY.CLUB Thailand, 2025 Developed by Pranai Phoprasat
(concept idea CIY.CLUB Myanmar)
Email : ciyclub.th.coaches@gmail.com

- **Key Lesson**: AI tools are not private spaces, and they do not "forget" information like humans do
- https://www.youtube.com/watch?v=UAHDtXDn56Y
- https://www.scribd.com/document/937925084/AI-is-Not-Your-Friend

Learning Activities

Activity 1: Safe or Not Safe? (Decision Game)

Time: 10 minutes

How it works:

The coach reads examples. Students vote:

- Safe to share
- Not safe to share

Examples:

- Your favorite color
- Your school name
- Your home address
- Your hobbies
- A photo of your face

Purpose:

- Build quick safety judgment
- Encourage discussion

Activity 2: AI Is Not a Friend

Time: 15 minutes

Coach asks:

CIY.CLUB
CODE IT YOURSELF

- Can AI keep secrets?
- Does AI care about your feelings?
- Can AI protect you?

Students discuss why AI feels friendly but is not human.

Key message:

> "Friendly responses do not mean safe systems."

Activity 3: What Could Go Wrong? (Scenario Thinking)

Time: 15 minutes

Coach presents scenarios:

- Sharing school information
- Uploading personal photos
- Asking AI for personal advice

Students discuss:

- What could go wrong?
- How could this affect someone later?

Purpose:

- Develop risk awareness
- Connect actions to consequences

Activity 4: My Safety Rule

Time: 10–15 minutes

Students complete:

CIY.CLUB
CODE IT YOURSELF

“One rule I will always follow when using AI is…”

Examples:

- “I will not share personal information.”
- “I will ask an adult if I am unsure.”

Purpose:

- Build personal accountability
- Reinforce safe habits

CIY.CLUB
CODE IT YOURSELF

© CIY.CLUB Thailand, 2025 Developed by Pranai Phoprasat
(concept idea CIY.CLUB Myanmar)
Email : ciyclub.th.coaches@gmail.com

Mini Checkpoint

Students answer:

- Name one thing you should not share with AI
- Why is AI not a private friend?
- What should you do if you feel unsure?

Skills & Mindsets Developed

- Digital Safety Awareness
- Risk Assessment
- Responsible Online Behavior
- Ethical Thinking

Key Message for Students

> "Being smart with AI means being safe first."

Outcome (Parent-Visible Value)

Students understand how to protect themselves online and use AI tools responsibly without sharing personal or sensitive information.

CIY.CLUB
CODE IT YOURSELF

(concept idea CIY.CLUB Myanmar)
Email : ciyclub.th.coaches@gmail.com

AI Explorer – Explorer E05

Using AI Responsibly (AI as a Helper, Not a Replacement)

Purpose of This Lesson (Coach Note)

This lesson defines the ethical line between help and dependency.

Explorer E05 teaches students that AI should support thinking, not replace it. This lesson directly addresses misuse such as copying answers, avoiding effort, or letting AI make decisions for them.

It reinforces personal responsibility and integrity in learning.

Overview

Explorer E05 focuses on responsible AI usage. Students learn the difference between **using AI as a tool** and **depending on AI as a replacement for thinking**. They explore when AI use is helpful and when it becomes inappropriate or harmful.

This lesson strengthens ethical awareness and academic honesty.

Learning Objectives

By the end of this lesson, students will be able to:

1. Explain what responsible AI use means
2. Identify appropriate and inappropriate uses of AI
3. Understand why humans must remain decision-makers
4. Demonstrate ethical thinking when using AI

© CIY.CLUB Thailand, 2025 Developed by Pranai Phoprasat
(concept idea CIY.CLUB Myanmar)
Email : ciyclub.th.coaches@gmail.com

Key Concepts

- AI is a support tool, not a decision-maker
- Effort and learning must still come from the student
- Copying AI output is not the same as learning
- Responsibility always stays with the user

Real-Life Examples (Connect to Students)

- Using a calculator vs learning math
- Using spell-check vs writing an essay
- Getting hints in a game vs using cheats

Coach emphasis:

> “Help makes you stronger. Replacement makes you weaker.”

Teaching Tools & Activities

1. Interactive Tool: AI Fact-Checker Challenge

- **Teaching Purpose**: To demonstrate that students must remain the decision-makers even when AI provides answers.
- **Activity**: Give students an AI-generated paragraph about a historical event that contains one subtle "fake" fact.
- **Key Lesson**: Responsibility for the final result always stays with the user.

2. Video Resource: The Calculator Analogy

- **Search Title**: *"Using a Calculator vs. Learning Math"*.
- **Teaching Purpose**: To show that help makes you stronger, but replacement makes you weaker.
- **Key Lesson**: Effort and learning must come from the student; AI is just a support tool.

© CIY.CLUB Thailand, 2025 Developed by Pranai Phoprasat
(concept idea CIY.CLUB Myanmar)
Email : ciyclub.th.coaches@gmail.com

3. Classroom Activity: "The Learning Ownership Line"

- **Method**: Coach draws a line on the board with "My Thinking" on one side and "AI Thinking" on the other.
- **Student Task**: Students place cards like "Writing an essay" or "Checking spell-check" along the line.
- **Goal**: To visualize the balance between human effort and AI assistance.

4. Group Discussion: "Help or Replace?"

- **Method**: Present scenarios such as "Asking AI for ideas" versus "Copying AI answers into homework".
- **Student Task**: Students vote and explain why one is responsible and the other is not.
- **Goal**: To clarify ethical boundaries and prevent dependency

Learning Activities

Activity 1: Help or Replace?

Time: 10 minutes

Coach presents situations. Students decide:

- Responsible use
- Not responsible use

Examples:

- Asking AI for ideas, then writing yourself
- Copying AI answers into homework
- Using AI to check grammar
- Letting AI decide your opinion

Purpose:

CIY.CLUB
CODE IT YOURSELF

- Clarify ethical boundaries
- Build judgment skills

Activity 2: The Learning Ownership Line

Time: 15 minutes

Coach draws a line:

"My Thinking" ←→ "AI Thinking"

Students place examples along the line.

Discuss:

- Where should most schoolwork be?
- When is AI helpful?

Purpose:

- Visualize responsibility
- Encourage balance

CIY.CLUB
CODE IT YOURSELF

Activity 3: Why Effort Still Matters

Time: 15 minutes

Coach asks:

- What happens if you stop thinking?
- Can AI learn for you?
- Who improves when AI does the work?

Students discuss long-term effects.

Purpose:

© CIY.CLUB Thailand, 2025 Developed by Pranai Phoprasat
(concept idea CIY.CLUB Myanmar)
Email : ciyclub.th.coaches@gmail.com

- Reinforce learning mindset
- Prevent dependency

Activity 4: My Responsible AI Promise

Time: 10–15 minutes

Students complete:

> "I will use AI responsibly by…"

Examples:

- "I will try first before asking AI."
- "I will use AI to improve my work, not replace it."

Purpose:

- Build accountability
- Internalize ethical use

CIY.CLUB
CODE IT YOURSELF

Mini Checkpoint

Students answer:

- One responsible way to use AI
- One irresponsible way to use AI
- Who is responsible for AI results?

© CIY.CLUB Thailand, 2025 Developed by Pranai Phoprasat
(concept idea CIY.CLUB Myanmar)
Email : ciyclub.th.coaches@gmail.com

Skills & Mindsets Developed

- Ethical Reasoning
- Responsibility
- Self-Discipline
- Learning Integrity

Key Message for Students

> “AI can help you learn, but it cannot learn for you.”

Outcome (Parent-Visible Value)

Students develop healthy AI habits, maintain academic honesty, and understand the importance of personal effort in learning.

AI Explorer – Explorer E06

Images & Visuals with AI (Seeing Is Not Always Believing)

Purpose of This Lesson (Coach Note)

This lesson teaches visual skepticism.

Explorer E06 helps students understand that AI-generated images can look real but may not represent reality. This lesson prepares students to question visuals, not just text, and prevents blind trust in AI-created images.

This is a critical step toward media literacy and fake content awareness.

Overview

Explorer E06 introduces students to how AI creates images from text instructions and why AI-generated visuals can be misleading. Students learn that **realistic images do not always mean real events**, and that images can be created, altered, or manipulated by AI.

Learning Objectives

By the end of this lesson, students will be able to:

1. Explain how AI can generate images from text
2. Recognize that images can be AI-generated or manipulated
3. Understand why visuals can be misleading
4. Apply critical thinking when viewing images

© CIY.CLUB Thailand, 2025 Developed by Pranai Phoprasat
(concept idea CIY.CLUB Myanmar)
Email : ciyclub.th.coaches@gmail.com

Key Concepts

- AI generates images based on patterns and examples
- Images can look real without being real
- Visual realism does not equal truth
- Humans must verify visual information

Real-Life Examples (Connect to Students)

- Social media images
- AI avatars and filters
- Deepfake-style visuals
- Edited or enhanced photos

Coach emphasis:

> “Your eyes can be fooled — your thinking should not be.”

Teaching Tools & Activities

1. Interactive Quiz: Adobe "Real or Fake"

- **Link**: Adobe Real or Photoshop Quiz
- **Teaching Purpose**: Train students to notice tiny details AI often misses, such as extra fingers, distorted backgrounds, or blurred text.
- **Activity**: Use the quiz for a classroom vote on each image to start the **"Real or AI?"** discussion.

2. Video Resource: How AI Images are Created

- **Search Title**: *"How AI Image Generators Work (by Vox or Code.org)"*
- **Teaching Purpose**: Explain that AI generates images based on pixel patterns and massive datasets, not a camera capturing reality.

CIY.CLUB
CODE IT YOURSELF

- **Key Lesson**: **Visual realism does not equal truth.** Realistic-looking images can be completely fake.

3. Classroom Activity: "Spot the Glitch"

- **Method**: Coach displays AI-generated images with specific errors (e.g., 6 fingers, floating objects, or asymmetrical glasses).
- **Student Task**: Compete to find as many "unrealistic" parts in the image as possible.
- **Goal**: Reduce automatic trust in photos and develop critical observation.

4. Scenario Analysis: "The Viral Fake Image"

- **Method**: Present a scenario where a shocking image of a famous event is being shared everywhere online.
- **Student Task**: Formulate a **"Verification Checklist"** by asking: *"Who posted this?"* and *"Is it physically possible?"*.
- **Goal**: Create a lifelong habit of verifying visual information before believing or sharing it.

CIY.CLUB
CODE IT YOURSELF

Learning Activities

Activity 1: Real or AI?

Time: 10 minutes

Coach shows a mix of:

- Real photos
- AI-generated images

Students vote:

- Real
- AI-generated
- Not sure

© CIY.CLUB Thailand, 2025 Developed by Pranai Phoprasat
(concept idea CIY.CLUB Myanmar)
Email : ciyclub.th.coaches@gmail.com

Discuss why they chose their answers.

Purpose:

- Build visual skepticism
- Encourage reasoning

Activity 2: How AI Creates Images

Time: 15 minutes

Coach explains:

- Text prompt → pattern matching → image generation

Use a simple example:

> "A cat wearing sunglasses on a beach"

Students discuss:

- Where does AI get these ideas?
- Has this really happened?

Purpose:

- Understand generation vs reality
- Reduce image trust

Activity 3: Image Misinformation Scenario

Time: 15 minutes

Coach presents a scenario:

> "An image shows a famous event. Everyone is sharing it."

CIY.CLUB
CODE IT YOURSELF

Students discuss:

- What questions should you ask?
- How could this image be fake?

Purpose:

- Practice verification thinking
- Prepare for fake news topics

Activity 4: Visual Safety Rule

Time: 10–15 minutes

Students complete:

> "When I see images online, I will…"

Examples:

- "Check the source."
- "Not believe images immediately."

Purpose:

- Build responsible viewing habits
- Encourage skepticism

CIY.CLUB
CODE IT YOURSELF

Mini Checkpoint

Students answer:

- Can images lie?
- Why do AI images look real?
- What should you do before believing an image?

Skills & Mindsets Developed

- Media Literacy
- Critical Observation
- Ethical Awareness
- Visual Reasoning

Key Message for Students

> “Real-looking images are not always real.”

Outcome (Parent-Visible Value)

Students develop visual media awareness and learn to question images instead of trusting appearances.

AI Explorer – Explorer E07

Writing with AI (Support, Not Substitution)

Purpose of This Lesson (Coach Note)

This lesson protects students' thinking and voice.

Explorer E07 teaches students how AI can support writing without replacing their ideas. The goal is to help students improve clarity, structure, and language while keeping **ownership of content and meaning**.

This lesson directly prevents copy-paste behavior and strengthens communication skills.

Overview

Explorer E07 introduces students to using AI as a writing assistant rather than an author. Students explore how AI can help with ideas, structure, grammar, and improvement, while learning why original thinking and personal voice still matter.

Learning Objectives

By the end of this lesson, students will be able to:

1. Identify appropriate ways to use AI for writing
2. Distinguish between assistance and replacement
3. Improve writing using AI feedback
4. Maintain ownership of ideas and meaning

Key Concepts

- AI can support writing, not think for you
- Ideas should come from the student
- Editing is different from copying
- Ownership matters more than perfection

CIY.CLUB
CODE IT YOURSELF

Real-Life Examples (Connect to Students)

- Spell-check vs writing an essay
- Asking a teacher to review work
- Using grammar tools
- Getting feedback from a friend

Coach emphasis:

> "AI can polish your work — it should not write your thoughts."

Teaching Tools & Activities

1. Interactive Tool: Hemingway Editor

- **Website**: hemingwayapp.com
- **Teaching Purpose**: To show how AI provides feedback on clarity and readability without writing the content for the student.
- **Activity**: Have students paste their original paragraph and use the AI's "color-coded" feedback to simplify their own sentences.
- **Key Lesson**: Editing and improving clarity is different from copying.

2. Interactive Tool: QuillBot (Grammar Checker)

- **Website**: quillbot.com/grammar-check
- **Teaching Purpose**: To demonstrate responsible AI assistance for grammar and spelling.
- **Activity**: Use the tool to check a student-written text for errors.
- **Key Lesson**: AI can polish your work, but it should not write your thoughts.

3. Classroom Activity: "Student First, AI Second"

- **Method**: Students write a short paragraph on "My favorite place" with **no AI** allowed at first.
- **Student Task**: Once written, they can use AI tools only to "Make this clearer" or "Check grammar".
- **Goal**: To reinforce the thinking-first habit and ensure the student owns the ideas.

4. Comparison Challenge: "Spot the Robot"

CIY.CLUB
CODE IT YOURSELF

- **Method**: The coach shows one sample lightly improved by AI and one fully generated by AI.
- **Student Task**: Students identify which one feels more personal and shows actual human thinking.
- **Goal**: To build awareness of AI's limitations in expressing personal voice and authenticity.

Learning Activities

Activity 1: Student First, AI Second

Time: 10 minutes

Students write a short paragraph on a simple topic:

> "My favorite place."

No AI allowed at first.

Then discuss:

- Was it easy or hard?
- What part needs improvement?

Purpose:

- Reinforce thinking-first habit
- Establish ownership

Activity 2: Improving with AI (Guided Use)

Time: 15 minutes

Coach demonstrates safe prompts:

- "Check grammar."
- "Make this clearer."
- "Suggest improvements without changing meaning."

Compare:

- Original text

CIY.CLUB
CODE IT YOURSELF

- AI-improved version

Purpose:

- Show ethical AI assistance
- Improve writing quality responsibly

Activity 3: Spot the Problem

Time: 15 minutes

Coach shows two samples:

- One lightly improved by AI
- One fully written by AI

Students identify:

- Which one feels less personal?
- Which one shows thinking?

Purpose:

- Build detection awareness
- Reinforce authenticity

CIY.CLUB
CODE IT YOURSELF

Activity 4: My Writing Rule

Time: 10–15 minutes

Students complete:

> "When I use AI for writing, I will…"

Examples:

- "Write my ideas first."
- "Use AI only to improve clarity."

Purpose:

- Build integrity
- Encourage reflection

© CIY.CLUB Thailand, 2025 Developed by Pranai Phoprasat
(concept idea CIY.CLUB Myanmar)
Email : ciyclub.th.coaches@gmail.com

Mini Checkpoint

Students answer:

- One good way to use AI for writing
- One bad way to use AI for writing
- Who owns the writing when AI helps?

Skills & Mindsets Developed

- Communication Skills
- Ethical Writing
- Self-Expression
- Responsible AI Use

Key Message for Students

> “AI can help you write better — not think for you.”

Outcome (Parent-Visible Value)

Students learn to use AI to improve writing quality while keeping originality, honesty, and personal voice.

AI Explorer – Explorer E08

Slides & Presentations with AI (Structure Before Style)

Purpose of This Lesson (Coach Note)

> **This lesson teaches students that AI can organize ideas — but humans must tell the story.**

Explorer E08 focuses on using AI to **support planning and structure**, not to automatically generate final presentations. Students learn that good presentations come from clear thinking, not from beautiful slides alone.

This lesson protects students from becoming “AI slide operators” instead of communicators.

Overview

Explorer E08 introduces students to creating presentations with AI support. Students learn how AI can help organize ideas, suggest outlines, and improve clarity, while emphasizing that **visual design, storytelling, and explanation must remain human-led**.

Learning Objectives

By the end of this lesson, students will be able to:

1. Explain how AI can help plan presentations
2. Use AI to organize ideas into clear structure
3. Create slides without relying on AI auto-generation
4. Present ideas using their own words and understanding

Key Concepts

- AI can help organize ideas, not replace thinking
- Structure matters more than visuals
- Slides support the speaker, not the opposite
- Understanding is more important than decoration

© CIY.CLUB Thailand, 2025 Developed by Pranai Phoprasat
(concept idea CIY.CLUB Myanmar)
Email : ciyclub.th.coaches@gmail.com

Real-Life Examples (Connect to Students)

- A speaker reading slides vs explaining ideas
- A messy presentation with nice design
- A clear talk with simple slides
- Storytelling vs decoration

Coach emphasis:

> "Slides should help your voice — not replace it."

Teaching Tools & Activities (Explorer E08)

1. Interactive Tool: AI Chat Tool (for Outlining)

- **Website**: gemini.google.com or chatgpt.com
- **Teaching Purpose**: To demonstrate using AI for planning and structure rather than final generation.
- **Activity**: Use a prompt like: *"Create an outline for a presentation about space for kids"*. Have students rearrange or remove points to fit their own story.
- **Key Lesson**: AI can help organize ideas, but it should not replace your thinking.

2. Video/Visual Resource: Good vs. Bad Slides

- **Search Title**: *"Presentation Design for Students: Simple vs. Crowded Slides"*
- **Teaching Purpose**: To build slide literacy and show that slides support the speaker, not the other way around.
- **Activity**: Show one text-heavy, crowded slide and one clear, simple slide. Ask: *"Which helps the speaker more?"*.
- **Key Lesson**: **Structure matters more than visuals**.

3. Classroom Activity: "Human Design, Human Slides"

- **Method**: Students use **Canva** or **Google Slides** with a strict rule: **No AI auto-slide generation**.
- **Student Task**: Use AI only to brainstorm 5 key points about a topic , then manually design the slides to explain those points in their own words.
- **Goal**: Prevent dependency and reinforce that understanding is more important than decoration.

CIY.CLUB
CODE IT YOURSELF

4. Reflection: "Slide Ownership"

- **Method**: Complete the sentence: *"When I make slides, I will..."*.
- **Examples**: "Explain ideas, not read slides" or "Design slides to support my story".
- **Goal**: Build a presentation mindset and encourage confidence in their own voice.

Learning Activities

Activity 1: Good Slides vs Bad Slides

Time: 10 minutes

Coach shows two slide examples:

- One crowded, text-heavy slide
- One clear, simple slide

Students discuss:

- Which is easier to understand?
- Which helps the speaker more?

Purpose:

- Build slide literacy
- Emphasize clarity

CIY.CLUB
CODE IT YOURSELF

Activity 2: Using AI for Structure (Not Slides)

Time: 15 minutes

Coach demonstrates safe AI prompts:

- “Create an outline for a presentation about space.”
- “List 5 key points for explaining climate change to kids.”

Students review the outline and:

- Rearrange points
- Remove unnecessary parts
- Add missing ideas

© CIY.CLUB Thailand, 2025 Developed by Pranai Phoprasat
(concept idea CIY.CLUB Myanmar)
Email : ciyclub.th.coaches@gmail.com

Purpose:

- Teach planning with AI
- Maintain ownership

Activity 3: Human Design, Human Slides

Time: 20 minutes

Students create slides using:

- Canva / Google Slides

Rules:

- No AI auto-slide generation
- Use AI only for outline or ideas

Students explain one slide in their own words.

Purpose:

- Reinforce understanding
- Prevent dependency

Activity 4: Slide Ownership Reflection

Time: 10–15 minutes

Students complete:

> "When I make slides, I will…"

Examples:

- "Explain ideas, not read slides."
- "Design slides to support my story."

Purpose:

- Build presentation mindset
- Encourage confidence

CIY.CLUB
CODE IT YOURSELF

Mini Checkpoint

Students answer:

- What are slides for?
- How can AI help presentations?
- What should AI not do?

Skills & Mindsets Developed

- Communication & Presentation Skills
- Organization & Planning
- Responsible AI Use
- Confidence Building

Key Message for Students

> “Slides support your thinking — they do not replace it.”

Outcome (Parent-Visible Value)

Students learn to communicate ideas clearly, use AI responsibly for planning, and avoid over-reliance on auto-generated content.

AI Explorer – Explorer E09

Projects & Applied AI (From Learning to Doing)

Purpose of This Lesson (Coach Note)

This lesson shifts students from understanding AI to applying it responsibly.

Explorer E09 is where students stop learning concepts in isolation and begin **using AI as part of a real task**. The focus is not technical complexity, but **decision-making, explanation, and ownership**.

This lesson reveals whether students truly understand E01–E08.

Overview

Explorer E09 introduces students to a small, structured project where AI is used as a tool to support creation. Students apply what they have learned about AI, prompts, responsibility, writing, visuals, and presentation to produce a simple but meaningful outcome.

The emphasis is on **process over product**.

Learning Objectives

By the end of this lesson, students will be able to:

1. Use AI to support a small project
2. Explain how and why they used AI
3. Demonstrate responsible decision-making
4. Take ownership of their work and ideas

© CIY.CLUB Thailand, 2025 Developed by Pranai Phoprasat
(concept idea CIY.CLUB Myanmar)
Email : ciyclub.th.coaches@gmail.com

Key Concepts

- Projects combine multiple skills
- AI supports the process, not the ownership
- Explaining decisions matters more than results
- Learning is visible through reasoning

Project Scope (Teacher-Defined)

Choose **one simple project type** depending on age and time:

- A short story with AI-assisted improvement
- A mini presentation on a topic of interest
- A poster or slide explaining a concept
- A short written explanation with visuals

Rule:

AI may assist, but students must explain every part.

CIY.CLUB
CODE IT YOURSELF

Learning Activities

Activity 1: Project Planning (Human First)

Time: 15 minutes

Students choose a topic and answer:

- What is my idea?
- What do I already know?
- Where might AI help?

AI is not used yet.

Purpose:

© CIY.CLUB Thailand, 2025 Developed by Pranai Phoprasat
(concept idea CIY.CLUB Myanmar)
Email : ciyclub.th.coaches@gmail.com

- Reinforce thinking-first habit
- Prevent instant dependency

Activity 2: Responsible AI Use

Time: 20 minutes

Students use AI only for:

- Idea expansion
- Structure
- Improvement suggestions

Coach monitors prompts and decisions.

Students must note:

- What did AI help with?
- What did I decide myself?

Purpose:

- Make AI use visible
- Encourage reflection

Activity 3: Explain Your AI Use

Time: 15 minutes

Students answer verbally or in writing:

- How did you use AI?
- Why did you accept or reject its suggestions?
- What part is completely yours?

Purpose:

CIY.CLUB
CODE IT YOURSELF

- Build metacognition
- Reveal understanding

Activity 4: Share & Reflect

Time: 10–15 minutes

Students share their project briefly.

Peer questions:

- What did AI help with?
- What did you decide yourself?

Purpose:

- Normalize transparency
- Reinforce responsibility

Mini Checkpoint

Students answer:

- One thing AI helped me with
- One decision I made myself
- One thing I learned about using AI

Skills & Mindsets Developed

- Applied Critical Thinking
- Project Ownership
- Ethical Decision-Making
- Communication

CIY.CLUB
CODE IT YOURSELF

Key Message for Students

> “Using AI responsibly means explaining your choices.”

Outcome (Parent-Visible Value)

Students demonstrate practical AI use while maintaining ownership, reasoning, and ethical awareness.

AI Explorer – Explorer E10

AI & Video Content (Reality, Creation, and Manipulation)

Purpose of This Lesson (Coach Note)

> **This lesson teaches students that video is the most powerful — and most dangerous — AI format.**

Explorer E10 helps students understand how AI can generate, edit, and manipulate video content. Because video feels more “real” than text or images, this lesson builds **critical awareness before trust**.

This lesson is a direct bridge to misinformation and fake news topics in E11.

Overview

Explorer E10 introduces students to AI-generated and AI-enhanced video content. Students explore how videos can be created or altered using AI and why visual motion, sound, and realism can strongly influence belief.

CIY CLUB
CODE IT YOURSELF

The lesson emphasizes that **seeing a video does not guarantee truth**.

Learning Objectives

By the end of this lesson, students will be able to:

1. Explain how AI can create or modify video content
2. Understand why videos can be misleading
3. Identify risks of trusting video content blindly
4. Apply critical thinking when watching videos

© CIY.CLUB Thailand, 2025 Developed by Pranai Phoprasat
(concept idea CIY.CLUB Myanmar)
Email : ciyclub.th.coaches@gmail.com

Key Concepts

- AI can generate or modify video
- Motion and sound increase emotional impact
- Realistic video does not equal real events
- Humans must verify video information

Real-Life Examples (Connect to Students)

- AI-generated characters or avatars
- Face-swapping and voice cloning
- Edited videos on social media
- Auto-generated captions and voiceovers

Coach emphasis:

> "Video feels real — that's why we must think harder."

Teaching Tools & Activities

1. Interactive Tool: Deepfake Awareness Test

- **Website**: Detect Fakes (MIT Media Lab)
- **Teaching Purpose**: To show how AI can modify video content and why videos can be misleading.
- **Activity**: Have students watch short video clips and guess which ones are real and which are AI-manipulated.
- **Key Lesson**: **Realistic video does not equal real events**.

2. Video Resource: The Magic of AI Video

- **Search Title**: *"Sora AI video examples"* or *"Runway Gen-2 AI video showcase"*
- **Teaching Purpose**: To explore AI-generated and edited videos and understand why video is a powerful format.

© CIY.CLUB Thailand, 2025 Developed by Pranai Phoprasat
(concept idea CIY.CLUB Myanmar)
Email : ciyclub.th.coaches@gmail.com

- **Key Lesson**: Motion and sound increase emotional impact, which can strongly influence belief.

3. Classroom Activity: "Video Scenario Analysis"

- **Method**: Present a scenario: *"A video shows a famous person saying something shocking. Everyone is sharing it"*.
- **Student Task**: Students must answer: *"What questions should you ask?"*, *"How could this be fake?"*, and *"What would you check first?"*.
- **Goal**: Develop verification thinking and critical questioning habits.

4. Habit Formation: "My Video Trust Rule"

- **Student Task**: Complete the sentence: *"Before believing a video, I will..."*.
- **Examples**: "Check the source" , "Look for other evidence" , or "Ask an adult or teacher".
- **Goal**: To build media literacy and personal responsibility.

CIY.CLUB
CODE IT YOURSELF

Learning Activities

Activity 1: Why Video Feels More Real

Time: 10 minutes

Coach asks:

- Why do people believe videos more than text?
- How do sound, movement, and faces affect trust?

Students discuss emotional impact.

Purpose:

- Awareness of psychological influence
- Prepare skepticism mindset

Activity 2: How AI Changes Video

Time: 15 minutes

Coach explains (no tools required):

- Face generation
- Voice synthesis
- Video editing automation

Students discuss:

- Which changes are helpful?
- Which are risky?

Purpose:

- Balanced understanding
- Ethical awareness

Activity 3: Video Scenario Analysis

Time: 20 minutes

Coach presents a scenario:

> "A video shows a famous person saying something shocking."

Students answer:

- What questions should you ask?
- How could this video be fake?
- What would you check first?

Purpose:

- Verification thinking

CIY.CLUB
CODE IT YOURSELF

- Critical questioning

Activity 4: My Video Trust Rule

Time: 10–15 minutes

Students complete:

> "Before believing a video, I will…"

Examples:

- "Check the source."
- "Look for other evidence."
- "Ask an adult or teacher."

Purpose:

- Personal responsibility
- Habit formation

CIY.CLUB
CODE IT YOURSELF

Mini Checkpoint

Students answer:

- Why are videos powerful?
- How can AI manipulate videos?
- What should you do before trusting a video?

Skills & Mindsets Developed

- Media Literacy
- Critical Thinking
- Emotional Awareness
- Ethical Judgment

© CIY.CLUB Thailand, 2025 Developed by Pranai Phoprasat
(concept idea CIY.CLUB Myanmar)
Email : ciyclub.th.coaches@gmail.com

Key Message for Students

> “The more real something looks, the more carefully you must think.”

Outcome (Parent-Visible Value)

Students understand video manipulation risks and develop skepticism toward emotionally powerful media.

AI Explorer – Explorer E11

Spotting Fake News & Misinformation (Think Before You Believe)

Purpose of This Lesson (Coach Note)

> **This lesson trains students to slow down and think.**

Explorer E11 teaches students how misinformation spreads and why AI makes fake news easier, faster, and more convincing. The goal is **not fear**, but **awareness and judgment**.

This lesson measures whether students can truly apply everything from E01–E10.

Overview

Explorer E11 focuses on identifying fake news, misinformation, and misleading content in a digital world supported by AI. Students learn how false information is created, why people believe it, and how AI can amplify its spread.

CIY.CLUB
CODE IT YOURSELF

This lesson emphasizes **human thinking over AI assistance**.

Learning Objectives

By the end of this lesson, students will be able to:

1. Explain what fake news and misinformation are
2. Identify common signs of misleading information
3. Understand how AI can help spread fake news
4. Analyze information **without using AI**
5. Make careful decisions before sharing content

© CIY.CLUB Thailand, 2025 Developed by Pranai Phoprasat
(concept idea CIY.CLUB Myanmar)
Email : ciyclub.th.coaches@gmail.com

Key Concepts

- Fake news is designed to mislead or manipulate
- Misinformation spreads faster than truth
- AI can generate fake content quickly
- Critical thinking is the strongest defense

Real-Life Examples (Connect to Students)

- Viral social media posts
- Fake headlines
- Edited images or videos
- AI-generated articles or comments

Coach emphasis:

> “Fake news spreads because people react — not because it is true.”

Teaching Tools & Activities (Explorer E11)

1. Interactive Tool: Bad News Game

- **Website**: getbadnews.com
- **Teaching Purpose**: To identify common signs of misleading information and understand how AI can help spread fake news faster.
- **Activity**: Students play as an unscrupulous media mogul to gain "Followers" and "Credibility" using disinformation techniques.
    - **Junior Version**: For students aged 8-11, **Bad News Junior** is recommended.
- **Key Lesson**: Students analyze how fake news is designed to mislead or manipulate emotions.

2. Video Resource: How False Information Spreads

- **Search Title**: *"How false information spreads (by TED-Ed)"*

© CIY.CLUB Thailand, 2025 Developed by Pranai Phoprasat
(concept idea CIY.CLUB Myanmar)
Email : ciyclub.th.coaches@gmail.com

- **Teaching Purpose**: To explain why misinformation spreads faster than truth through emotional triggers like fear or anger.
- **Key Lesson**: Human thinking must overcome emotional reactions to information.

3. Classroom Activity: "Scenario Analysis (NO AI)"

- **Method**: Coach presents a realistic scenario of a shocking viral post.
- **Strict Rule**: **No AI tools allowed**; human thinking only.
- **Student Task**: Students must ask critical questions: *"What information is missing?"* and *"Who made this?"*.
- **Goal**: To build independent judgment and verify information carefully.

4. Habit Formation: "Stop-Think-Check Rule"

- **Method**: Teach a simple 3-step routine:
    1. **STOP**: Don't react or share immediately.
    2. **THINK**: Analyze the source and reasoning.
    3. **CHECK**: Look for other reliable sources to verify.
- **Goal**: To build a lifelong habit of responsible sharing in a digital world.

CIY.CLUB CODE IT YOURSELF

Learning Activities

Activity 1: Fact or Fake? (Warm-Up)

Time: 10 minutes

Coach shows short headlines or statements:

- Some true
- Some misleading
- Some false

Students vote:

- True

- Fake
- Not sure

Important rule:

No AI allowed

Thinking only

Purpose:

- Activate judgment
- Prepare analytical mindset

Activity 2: Why People Believe Fake News

Time: 15 minutes

Coach asks:

- Why do people share news without checking?
- How do emotions affect belief?
- What makes a headline “clickable”?

CIY.CLUB
CODE IT YOURSELF

Students discuss emotional triggers:

- Fear
- Anger
- Excitement

Purpose:

- Understand psychology
- Reduce emotional reactions

Activity 3: How AI Makes Fake News Worse

Time: 15 minutes

Coach explains:

- AI can generate articles, images, and videos quickly
- AI can personalize misinformation
- AI can scale fake content

Students discuss:

- Why speed is dangerous
- Why volume makes fake news harder to detect

Purpose:

- Connect AI power to risk
- Reinforce responsibility

Activity 4: Scenario Analysis (NO AI)

Time: 20 minutes

Coach presents a realistic scenario:

> "A post claims something shocking and everyone is sharing it."

Students must answer:

- What questions should you ask?
- What information is missing?
- What would you check first?

Strict rule:

No AI tools

Human thinking only

Purpose:

CIY.CLUB
CODE IT YOURSELF

- Test real understanding
- Build independent judgment

Activity 5: Stop–Think–Check Rule

Time: 10–15 minutes

Coach introduces a simple habit:

STOP – Don't react immediately
THINK – Who made this? Why?
CHECK – Look for other sources

Students create their own version of the rule.

Purpose:

- Build lifelong habit
- Encourage responsible sharing

CIY.CLUB
CODE IT YOURSELF

Mini Checkpoint (Quick Assessment – 3 minutes)

Students answer:

- One sign of fake news
- One reason fake news spreads
- One thing you should do before sharing

Skills & Mindsets Developed

- Critical Thinking
- Media Literacy
- Emotional Control
- Ethical Responsibility

Key Message for Students

"Fast information needs slow thinking."

Outcome (Parent-Visible Value)

Students learn to identify misinformation, resist emotional manipulation, and think carefully before believing or sharing information.

AI Explorer – Explorer E12

Reflection & The AI Explorer Journey (Thinking Forward)

Purpose of This Lesson (Coach Note)

> **This lesson is not about new knowledge — it is about growth.**

Explorer E12 helps students reflect on how their thinking about AI has changed. Instead of testing facts, this lesson measures **mindset, responsibility, and awareness** developed throughout Explorers E01–E11.

This lesson turns learning into long-term behavior.

Overview

Explorer E12 is the final lesson of the AI Explorer program. Students look back at their journey, reflect on their learning, and articulate how they will use AI responsibly in the future. The focus is on **thinking skills, decision-making, and personal responsibility**, not tools or features.

CIY.CLUB
CODE IT YOURSELF

Learning Objectives

By the end of this lesson, students will be able to:

1. Reflect on how their understanding of AI has evolved
2. Explain key lessons learned about AI responsibility and safety
3. Identify personal strengths and improvements
4. Commit to responsible AI use moving forward

Key Concepts

- Learning is about growth, not tools
- AI requires human judgment
- Responsibility lasts beyond the classroom
- Reflection strengthens understanding

Teaching Tools & Activities (Explorer E12)

1. Presentation: "The AI Explorer Roadmap"

- **Teaching Purpose**: To look back at the journey from E01 to E11 and summarize key lessons.
- **Activity**: Display a visual "map" of all 12 topics. Ask students to identify which lesson was their favorite and why.
- **Key Lesson**: Learning is about growth and mindset, not just technical tools.

2. Reflective Activity: "Then vs. Now" (Thinking Comparison)

- **Method**: Students answer two key questions to make their growth visible.
- **Student Task**:
  - *"What did I think AI was before this course?"*
  - *"What do I think AI is now?"*
- **Goal**: To reflect on how their understanding of AI has evolved from a "thinking being" to a "data-driven tool".

3. Creative Task: "AI Explorer Mindset Map"

- **Method**: Students create a simple framework for their future AI use.
- **Student Task**: Complete a map with three categories:
  - **AI can help with...**
  - **AI should not replace...**
  - **I am responsible for...**

CIY.CLUB
CODE IT YOURSELF

- **Goal**: To internalize ethical awareness and create a personal framework for responsible use.

4. Final Commitment: "The AI Explorer Promise"

- **Method**: A formal commitment to responsible AI use moving forward.
- **Student Task**: Complete the sentence: *"As an AI Explorer, I promise to..."*.
- **Examples**:
  - "Think before trusting AI".
  - "Use AI to help, not replace my thinking".
  - "Be responsible and ethical".
- **Goal**: To build an identity as a responsible and thoughtful AI user.

Learning Activities

Activity 1: Then vs Now (Thinking Comparison)

Time: 15 minutes

Students answer:

- What did I think AI was before this course?
- What do I think AI is now?

Students share changes in thinking.

Purpose:

- Make growth visible
- Reinforce learning impact

Activity 2: My Biggest AI Lesson

Time: 15 minutes

CIY.CLUB
CODE IT YOURSELF

Students choose one Explorer (E01–E11) and answer:

- What did I learn?
- Why does it matter?

Purpose:

- Connect lessons to meaning
- Reinforce retention

Activity 3: AI Explorer Mindset Map

Time: 20 minutes

Students create a simple map:

- AI can help with…
- AI should not replace…
- I am responsible for…

Purpose:

- Organize learning
- Create a personal framework

Activity 4: My AI Explorer Commitment

Time: 10–15 minutes

Students complete:

> "As an AI Explorer, I promise to…"

Examples:

- "Think before trusting AI."

CIY.CLUB
CODE IT YOURSELF

- “Use AI to help, not replace my thinking.”
- “Be responsible and ethical.”

Students may sign or present their commitment.

Purpose:

- Internalize responsibility
- Build identity as a responsible user

Mini Checkpoint (Reflection-Based)

Students share:

- One habit they will keep
- One thing they will be careful about
- One way AI can help them in the future

(No right or wrong answers)

CIY.CLUB
CODE IT YOURSELF

Skills & Mindsets Developed

- Self-Reflection
- Ethical Awareness
- Responsibility
- Long-Term Thinking

Key Message for Students

“AI is powerful — but your thinking is more important.”

Program Outcome (Parent-Visible Value)

Students complete the AI Explorer program with a **balanced, critical, and responsible mindset**, prepared to use AI safely and thoughtfully in real life.

Email : ciyclub.th.coaches@gmail.com

Final Curriculum Statement

The AI Explorer program does not teach students to depend on AI.

It teaches students to **think, question, and decide** in a world where AI exists.
